

SWAPNEIL BASUTKAR

Software Engineering and Enterprise AI

swapneil.basutkar@protonmail.com | Dallas, Texas

SUMMARY

Customer-facing software engineer with 5+ years across enterprise consulting and product development at Deloitte, Accenture, and SimplrOps. Builds production LLM applications and enterprise integrations, owning requirements gathering, success criteria, agent development, deployment, and production support.

TECHNICAL SKILLS

AI and LLMs: Claude Agent Skills, Anthropic and OpenAI APIs, LangChain, prompt engineering

Development: Python, TypeScript, JavaScript, SQL, Node.js, Flask, React, REST APIs

Cloud and data: AWS (Elastic Beanstalk, EC2, S3, RDS), PostgreSQL, MySQL, Docker

Delivery and reliability: GitHub Actions CI/CD, Git, Datadog, Robot Framework, Selenium

PROFESSIONAL EXPERIENCE

Deloitte | Dallas, TX (Remote)

Jan 2025 - Present

Software Engineer I

May 2026 - Present

- Built and deployed an internal AI agent with a custom Claude Agent Skill for Workday implementation analysis and configuration, reducing manual subject-matter expert effort by 80%. Owned requirements gathering, success criteria, agent design, and production rollout.
- Delivered Python and Node.js product features and production fixes, translating client-reported issues into engineering changes and deploying through GitHub Actions CI/CD.
- Redesigned Robot Framework pipelines with persisted checkpoints and idempotent recovery so interrupted enterprise workflows resume without redundant processing, reducing runtime and infrastructure cost.

Software Engineer (Services Associate)

Jan 2025 - May 2026

- Led an OpenAI and LangChain conversational AI agent from proof of concept to production on AWS Elastic Beanstalk, with a custom UI and RDS-backed conversation storage.
- Integrated Workday, SuccessFactors, and Oracle through SQL data pipelines and Node.js APIs serving customer-facing interfaces. Improved backend execution speed by 40% through Python and Robot Framework refactoring.
- Served as first-line technical contact for enterprise production issues, using Datadog logs to diagnose root causes, resolve incidents, and coordinate engineering fixes.

Software Engineer Intern | SimplrOps, Dallas, TX

Jul 2024 - Jan 2025

- Shipped full-stack features with Python/Flask, Node.js, React, and Angular and automated UI and data-processing tests with Robot Framework, cutting AWS deployment time by 60%.
- Owned production hotfixes through CI/CD, reducing issue resolution time from days to hours while maintaining 99.9% uptime.

Software Engineer | Accenture, India

Jul 2019 - Jul 2022

- Delivered Python, Selenium, and Automation Anywhere workflows for 5+ enterprise client projects; parallelized processing to cut execution time by 30% across 10,000+ monthly requests.
- Integrated SAP, Excel, and PDF data for financial reconciliation, reducing processing time from 5 days to 6 hours for \$10M+ in monthly transactions.
- Created version-controlled API specifications, process flows, and solution architecture documentation, reducing new-team onboarding time by 50%.

EDUCATION AND CERTIFICATIONS

M.S. Computer Science | East Texas A&M University | GPA 3.7

May 2024

B.Tech. Information Technology | SNIST, India

May 2019

Advanced Prompt Engineer with Coding | Deloitte AI Academy (DataCamp)

Apr 2025
